The background is a light-colored, marbled paper with a complex, swirling pattern of grey, white, and cream tones. Several circular embossed patterns are visible, resembling stylized floral or geometric designs, scattered across the surface.

GALAXY
RESEARCH
LAB

| Travel & Arrival |

Artist Selena Jin started the creation of GALAXY RESEARCH LAB in 2019, she intends to explore the mystery of different worlds. This series is divided into two parts, explaining the upcoming journey 『 Travel & Arrival 』 . It shows the scenes of traveling before arriving in another world and the new discoveries after arrival.

『 TRAVEL 』

Everyone is living in their own universe, searching and discovering something new about themselves.

Artist shares her own universe with the world in the 『 TRAVEL 』 part, using the galaxy as the "transmitter"

Soaked in her own emotions while she TRAVELS through her own universe, obstructing reality, feeling the world through her own perspective.

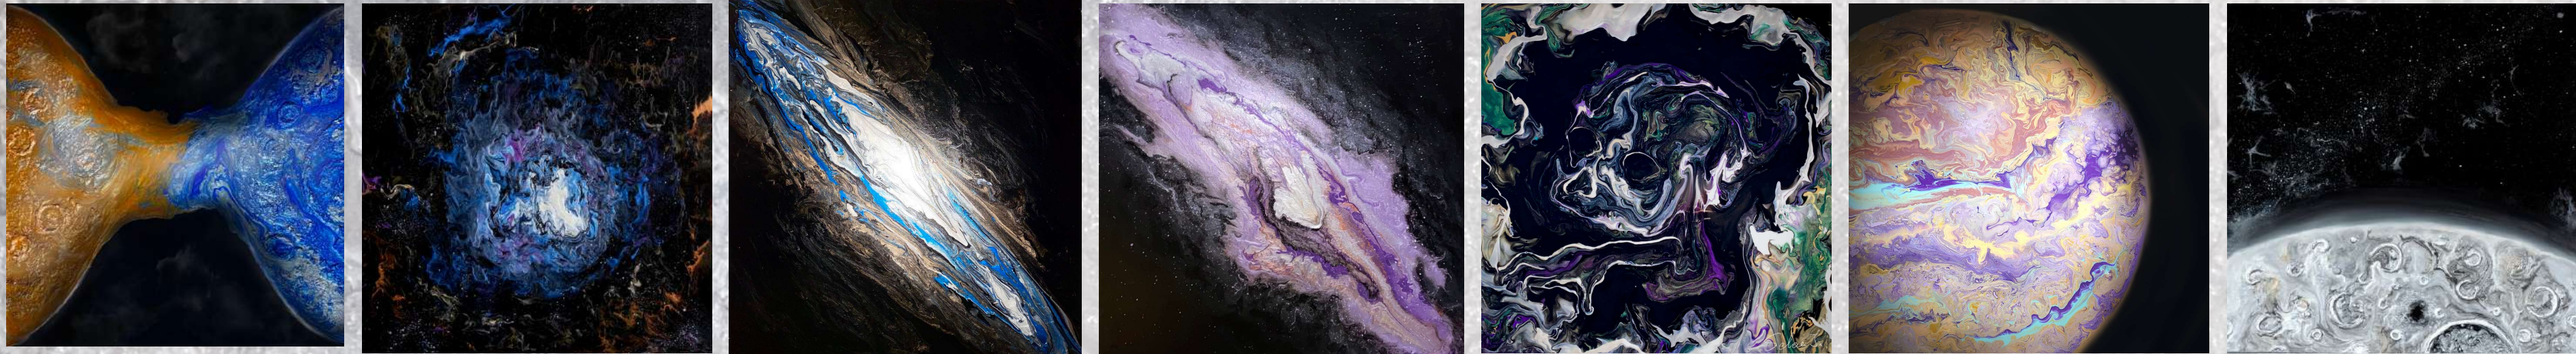

『 ARRIVAL 』

Every soul belongs to its own planet, Every planet has its own colour, texture, character and structure.

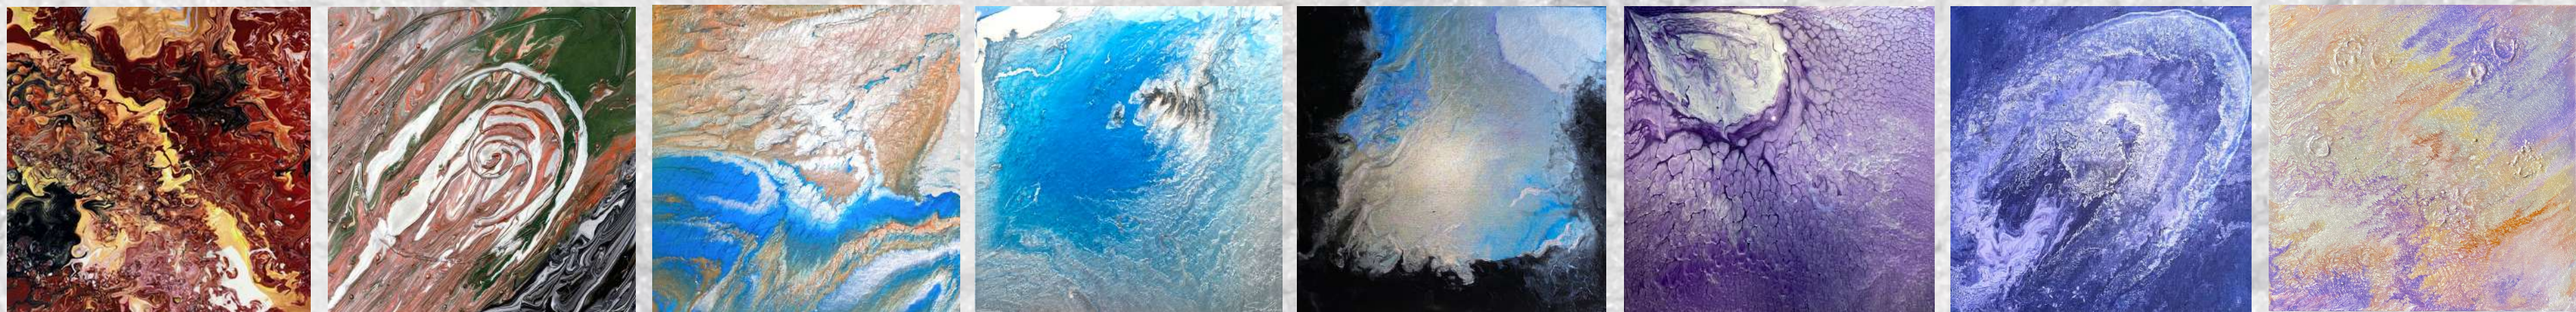

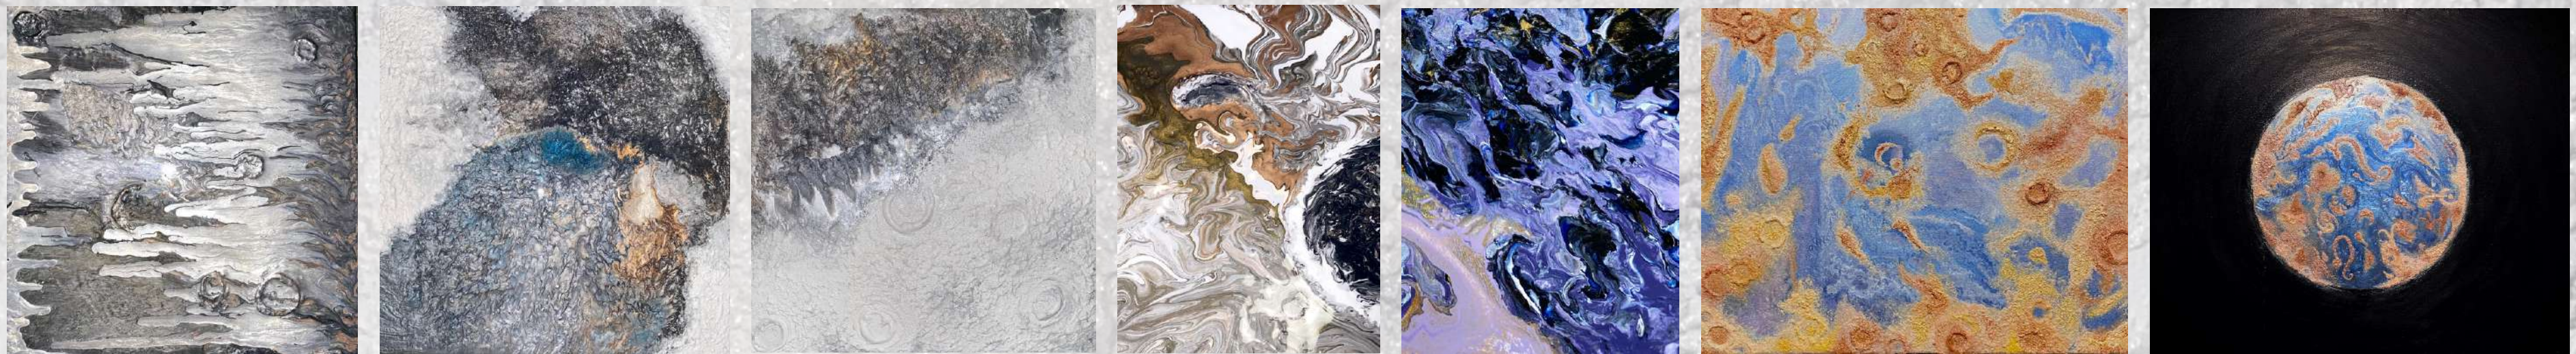

She circles around her planet and others, ARRIVING at other's "planet" by listening to their stories and feeling the emotions from people around her. Then uses her own understanding to reveal them.

The background is a complex marbled paper pattern. It features swirling, organic shapes in shades of brown, tan, and grey. A prominent feature is a large, textured area of gold leaf or gold pigment, which is concentrated in the upper left and middle sections. The right side of the image transitions into a darker, more intricate marbling pattern with deep black and dark grey tones. The overall effect is rich, textured, and artistic.
